

Replace this text with the article title

Author Name¹, Author Name¹ and Author Name¹

¹Department, Institution, City, Country

E-mail: author@institution.org

Abstract. This document provides guidance on the preparation of articles using the CIDSESRF, which provides page layout in the style required for CIDSESRF Conference Proceedings. Authors can use any additional packages they need, but must not change the page size or text area, and must not add headers, footers or page numbers. The submitted PDF must be in the final form ready for publication. The abstract should be within 350-400 words.

1 Introduction

Article text starts here. Do not change the page size or margins, and do not add headers, footers or page numbers. The submitted PDF must be in the final form ready for publication. Make sure you proofread your article before submitting it

Organise your text using section headings and include any equations, figures, tables, lists etc using your preferred LaTeX packages and commands.

2 General requirements

2.1 Page layout

The following details are set by the `iopconfser` class file. These points must be followed to avoid problems in the production of your article:

- page size: European A4;
- top-margin: 4 cm; bottom-margin: 2.7 cm; left- and right-margin: 2.5 cm;
- no page numbers, no other page headers or footers;
- text is single-spaced, not double-spaced.

In addition:

- all pages must be portrait orientation;
- all fonts must be embedded in the PDF.

2.2 Article content

All articles must have a title, authors and affiliations, and an abstract.

The abstract must be a single paragraph providing concise information about the content of the article, including the main results obtained and conclusions drawn. The abstract must not contain any table numbers, figure numbers, references or displayed mathematics. Leave at least 10 mm space below the abstract before starting the main text of your article on the same page.

Figures and tables must be placed close to where they are mentioned in the text, not all together at the end of the article. All figures and tables must have a caption. The template file includes placeholder text boxes for a figure and a table. Replace the placeholder information following the instructions in the template. Copy and paste the text boxes to add more tables or figures. Delete the text boxes if they are not required. Maximum article length should be 4000 words .

2.3 Equations

Insert equations and inline math expressions using MathType if available. Otherwise use the default Word equation editor. Equations that are converted to images are not permitted. Note that the Word auto-recover file will automatically convert equations to images. Save your file regularly to avoid needing to use the auto-recover file.

3 Reference styles

References should be cited using the Vancouver (numbered) system. References are numbered consecutively in the order in which they are first cited in the text. Citation numbers should be enclosed in square brackets, for example, [1] .

The reference list should contain all the information necessary to identify and locate each reference. The following formats should be used for the main types of references.

Authors, Year, Journal name, Volume number, Page/article number .

For example:

References

- [1] A B Author, C D Author and E F Author 2024 *J. Phys. Chem. C* 128 12345–12352
